Deadline: Saturday, September 2nd 2017 23:55 PM (scele's server time)
There will be score PENALTY for late submission

For all students in this course, you are required to do these following steps:

1. You must have a Google account. If you do not have a Google account, make a new account at this **link**.

2. You must have a GitHub account. If you do not have a GitHub account, make a new account. Follow the instructions in this **file**.

3. If you already have an account on GitHub, create a repository by following the guidance in this **file**.

4. Login to your Google account first. After that, fill out the form at this **link.**

5. After making all four steps above, wait for 24 hours. Then, check your submission status.

If your registration processed and filled with right information, you will find your github username at this **link**.
Else, if you find your github username on this **link**, this indicate wrong input of information.

You can know which information made you failed the registration by looking up to these details:
● Home_OK = no problem
● Home_FAILED = you fill the ldap/sso user wrongly
● GitUser_OK = no problem
● GitUser_FAILED = github account you registered on the form not found
● Repository_OK = no problem
● Repository_FAILED = you don't have repository named os172 on your github account

6. If you are registered, please login to badak.cs.ui.ac.id (10.119.1.2) through ssh by using your own SIAK account that has been registered. Follow the instructions in this **file.**

Ps: Please reply to **Week 0 Question and Answer** or contact the Lecturer Assistant of Operating System if:
● You are not registered after 24 hours,
● Can not log in to the server after registered, or
● You have any other question regarding this task.
